SERVICES

Audit of all logistics business processes of a company

Logistics consulting and support

LOGISTICS CONSULTING AND AUDIT

The purpose of logistics consulting is to achieve the company-client's strategic goals with the lowest expenses.

Logistics Consulting is management consulting, provided by our experts, on the organization of goods delivery chains, improving its efficiency and reducing expenses. We analyze and audit the following business processes: planning, purchases, storage, processing and transportation of goods.

Complex estimation of logistics service efficiency enables the company-client's management to make the right management decisions on minimizing of expenses and increasing the company income.

According to the results of the logistics audit, we formulate proposals for improvement of all business processes of a company in a form of a Consulting report. Then we create a project of optimal decisions introduction, approved by a client.

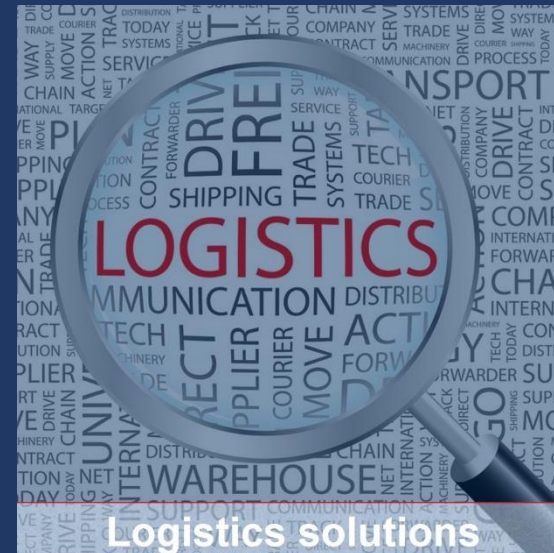

SERVICES

Cost cutting due to optimization of the logistics company work

Optimization of expenses

Development and introduction of optimal logistics solutions

INTRODUCTION OF LOGISTICS SOLUTIONS

The aim of Introduction of logistics solutions of a Project is to optimize business processes and financial expenses of a company.

To realize a Project of optimal solutions introduction a project department is established which includes our consultants and different specialists of our company.

A design department prepares a road map of actions for introduction of optimal project solutions, mentioning responsible persons and deadlines.

A number of activities are held to realize decisions of a Project.

A report on general cost cutting and achieved goals is prepared.

SERVICES

Outsourcing of Logistics department is external logistics management of your company.

Organization of your Company's logistics department work "from scratch"

OUTSOURCING AND ESTABLISHING OF LOGISTICS DEPARTMENT “FROM SCRATCH”

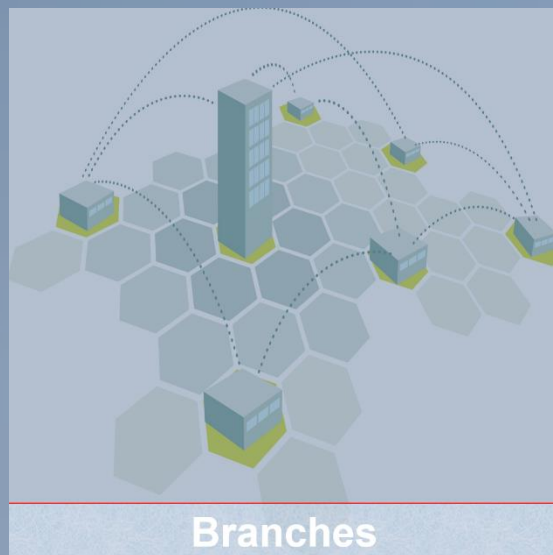

One way of cooperation is to delegate functional responsibilities of the logistics department staff to our outsourcing. We are ready to control all business processes of the goods movement in the delivery chain.

In addition, we have an experience of creating logistics departments “from scratch”, considering staff selection and its responsibilities, description of business processes and operating procedures of a company-client.
